

**OFF THE BEATEN TRACK
ANTHROPOLOGY FIELD SCHOOL**

TRANSCRIPT OF RECORDS

<p>NAME OF SENDING INSTITUTION: Expeditions, Research in Applied Anthropology INSTITUTION NUMBER: BE-0461.954.382 Program Director: XXXXXXXXX Grade given by the tutors and leading professors: XXXXX</p>
<p>NAME OF STUDENT: XXXX First Name: XXXX Date of birth: XX/XX/XXXX Sex : F M Matriculation date: XXXXX Matriculation number: XXXXXXXX E-MAIL ADDRESS: XXXXXXXXX</p>

ACADEMIC YEAR: 2018

FIELD OF STUDY: ANTHROPOLOGY

Course Unit Code	Title of the course unit	Duration of course unit	credits
ANT/892011/006	Experiential Learning in Anthropological Fieldwork	1 term	3
ANT/892011/006	Experiential Learning in Research Publication	1 term	6

Date: XXXX 2018

Signature of registrar/dean/administration officer:

Accreditation information on the Off The Beaten Track Field School

by Expeditions, Research in Applied Anthropology

Title	
EXPERIENTIAL LEARNING IN ANTHROPOLOGICAL FIELDWORK	
Course code	ANT/892011/006
Eligibility	The Field School is geared toward highly motivated undergraduate and graduate students in the social sciences. Past participants mostly had a background in anthropology, but a number of sociology, architecture, history and other fields have participated successfully. In general, participation in the program will benefit any student or professional looking to develop or refine skills in anthropological research methods.
General	The fieldwork is done in Gozo during the summer. Under guidance of mentors with field experience in Gozo, the individual student develops her/his research concept or topic and performs the necessary data gathering on it by interviewing and participant observation.
Selection	Students are chosen based on the application info they provide. Sometimes we consult them by video chat or personal meeting. At this point only 1 out of 8 applications gets selected. The selection is mostly based on educated enthusiasm, more then on academic merit.
General info	Student staff ratio is at most 2:1. The program is highly individually tailored, undergraduates, graduates as well as PhD students (and Post-Docs) will get the guidance they need. The student receives constant feedback and mentors join them in their fieldwork when required. The emphasis is on the independent confrontation with fieldwork. Next to that mandatory individual meetings are scheduled on a regular basis where the student show their progress.
Evaluation	Students are under permanent evaluation of their performance with focus on how well they deal with tensions and conflicts in this kind of fieldwork. We focus less on their failures, but on their ability to be resilient when confronted with the inherent challenges of conducting anthropological fieldwork. At the end of the program there is a presentation requirement that consists of a decently filled field-notebook, a poster presentation of their research and the performance of a keynote presentation.
Grading	A to F scale (or percentage when required)
Credits	3 Semester Credit Hours (minimum of 64 contact hours)
Information	www.anthropologyfieldschool.org
Contact	Sam Janssen, program director (sam.janssen@xpeditions.be)

Title	
EXPERIENTIAL LEARNING IN RESEARCH PUBLICATION	
Course code	ANT/892011/007
Eligibility	The student has finished Experiential Learning in Anthropological Fieldwork (ANT/892011/006)
General	Based on their fieldwork, participants are encouraged to start writing on a research paper after the summer project.
Process	After the student delivers her/his first article draft, one or two mentors get assigned to give feedback (this happens through e-mail and/or video conferencing). If the student doesn't back out of the process, we work with her/him until they have a publishable research paper. We assist with the publication. Not all students manage to finish an article, and that mostly depends on their persistency in data gathering during the fieldwork project. By the end of their fieldwork course students decide with their mentors if finishing a paper is possible for them.
Evaluation	Peer review of the article.
Grading	A to F scale (or percentage when required)
Credits	6 Semester Credit Hours (minimum of 80 working hours)
